# MADRID

- LED dots not visible even through the gap between the mirror and the wall.
- The combination of Alu U profile and milky PU belt cover makes the mirror look similar to others from outside but different and quite higher level from inside.
- Alu U profile embraces the LED stripe very well with a good disipation of heat produced by LED, making the life expectancy of LED much longer.
- PU milky belt cover make the LED dots invisible, unreachable from children's touch, light smoother and more protected from moisture and insects.
- A similar application to a luxury brand but price much more affordable.
- A huge viriaty of shapes and patterns include sqaure, round, oblong, egg, flower, arch and many others.
- Hot selling the whole world.
