

BABOLAT PADEL

PADEL STORY

Playing, indulging yourself, sharing and... growing.

Padel is a young sport, that's only been around for fifty years. It is more than a sport... it's a way of life.

Padel adds new followers across the globe every day. And it's already played in 80 countries worldwide. Why? Because Padel creates a community around the sport and makes you belong there, sharing its values and way of thinking. Babolat supports each of you by understanding your specific needs, anticipating evolutions in the game from beginners to Pro players, we develop quality products that make you play better than ever, and beaming on the court.

Our involvement and international influence is set to make us a key padel brand. We want to support and promote the sport's growth and we've got what it takes to achieve our ambition: A complete equipment (rackets, balls, shoes, and apparel) that offers a new vision of the game, and real benefits to players; our talent for innovation which is our driving force and will continue transforming the sport equipment in the coming years, our broad market exposure and customers relationship.

PARTNERSHIPS

Babolat and Michelin joined forces in 2003 to develop tennis shoes. A specialist in rubber wear and handling performance, Michelin develops products with its R&D teams at its Ladoux centre in Puy-de-Dôme, France. They also work together on the design and manufacture of padel shoes.

Developed together with Michelin researchers and inspired by rally tyres, Babolat soles are designed to sustain. Player profile and rubber tread design and formulation are among the variations that make the strength of Babolat shoe soles.

MONDO
A multinational design company that manufactures and sells artificial grass used for padel. Technical collaboration on the sole with the objective of addressing how effectively the shoe interacts with the artificial grass padel court.

PADEL TEAM

- JUAN LEBRON** (SPA) World Padel Tour PRO Player

- RAMIRO CHOYA** (SPA) World Padel Tour PRO Coach
- JORGE RODRIGUEZ** (ARG) World Padel Tour Pro Physical Trainer

PLAYERS TYPOLOGY

All padel players want to score points. At some point they all want to be STRIKERS. With a new game approach, we have worked to allow players to be who they want to be.

Our analysis of the game and the players led us to identify three strikers profiles.

The TECHNICAL striker wants to drive the game thanks to a perfect technical and tactical mastery. His powerful and well positioned viboras and smashes will be his best weapons to win the point.

The TECHNICAL rackets offer a **MILLIMETRIC POWER**

The AIR striker desires to fly on the court and seizes each opportunity to go to the net. His speed will allow him to make the difference thanks to his quick strokes which he will not hesitate to execute in extension.

The AIR rackets offer a **MANEUVERABLE POWER**

The COUNTER striker aspires to be a bulwark to withstand coming shots with patience. After having controlled the game he will be able to knock out his opponents with a strongly hit smash.

The COUNTER rackets offer a **CONTROLLABLE POWER**

TECHNOLOGIES

3K CARBON 12K CARBON 16K CARBON

Woven carbon fiber used on the surface of the racket to give maximal explosiveness and precision.

HPS HOLES PATTERN SYSTEM

Optimized distribution and size of holes for each racket shape to boost power transmission and increase precision when returning shots.

3D SPIN+

Reliefs on the racket surface combined with a rough finishing that allows to print even more spin to the ball and have a better control.

X-EVA

Sandwich construction of the core with 3 different EVA layers adapted to each racket. An increased explosiveness on strong shots thanks to the 2 stiffer exterior layers while the softer inside layer provides more tolerance and comfort on slower shots.

VIB VIBRABSORB SYSTEM

Powered by SMAC

Better vibration absorption thanks to a new elastomer material integrated in the graphite of the racket's heart that provides more comfort on each shot and reduces the risks of injury.

BENEFITS

EXPLOSIVE POWER

The combination of the carbon surface and the X-EVA technology allows an instantaneous power.

EXTREM SPIN

The new 3D SPIN+ technology allows to give even more effects to the ball.

COMFORT

The integration of the VIBRABSORB SYSTEM, Powered by SMAC, reduces the vibration due to carbons' rigidity giving a better comfort on each shot.

NEW

130

EXPLOSIVE POWER

The latest generation of Babolat's rackets, a range with the highest performances ever. The perfect response for players looking for extremely powerful rackets to astonish their opponents.

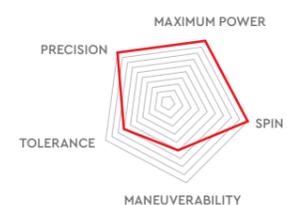

TECHNICAL VIPER

The best material combination and specifications for a MILLIMETRIC EXPLOSIVE POWER that will allow you to smash it out from anywhere.

TECHNOLOGIES

CARBON FLEX

Weave of two different materials on the racket surface to combine the benefits of each : explosive power of the carbon and easy power of the fiberglass. The perfect mix to have a more flexible surface providing a dynamic power.

3D^{SPIN}

Reliefs on the racket surface increasing the balls effects.

HPS HOLES PATTERN SYSTEM

Optimized distribution and size of holes for each racket shape to boost power transmission and increase precision when returning shots.

VIB VIBRABSORB SYSTEM

Powered by SMAC

Better vibration absorption thanks to a new elastomer material integrated in the graphite of the racket's heart that provides more comfort on each shot and reduces the risks of injury.

BENEFITS

DYNAMIC POWER

The new CARBON FLEX technology combined with the BLACK EVA gives an accelerating power to the ball.

SPIN

The 3D Spin technology facilitate the balls effects.

COMFORT

The integration of the VIBRABSORB SYSTEM, Powered by SMAC, reduces the vibration due to carbons' rigidity giving a better comfort on each shot.

BLACK e.v.a.

More elastic foam giving the player maximum power and comfort when hitting the ball.

NEW

132

DYNAMIC POWER

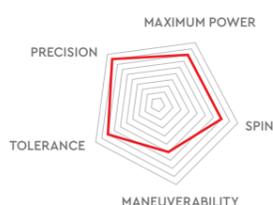

A brand-new type of racket using the unique CARBON FLEX technology. These rackets make accessible the power of the carbon to everyone.

EASY POWER

The softest version of this new generation of rackets. Perfectly adapted for players looking for maneuverable and tolerant rackets providing power without effort.

SOFT FIBER

Soft and flexible fibers used on the rackets surface to give power without effort with a maximum of comfort and tolerance.

HPS HOLES PATTERN SYSTEM

Optimized distribution and size of holes for each racket shape to boost power transmission and increase precision when returning shots.

BLACK e.v.a.

More elastic foam giving the player maximum power and comfort when hitting the ball.

VIB VIBRATION SYSTEM

Powered by SMAC

Better vibration absorption thanks to a new elastomer material integrated in the graphite of the racket's heart that provides more comfort on each shot and reduces the risks of injury.

BENEFITS

EASY POWER

The soft fibers used on the rackets surface provide a power without effort.

MANEUVERABILITY

The light weight of the rackets enable quicker and easier movements.

TOLERANCE

The softer construction of the rackets enlarge the sweetspot giving more tolerance.

TECHNICAL VERTUO
