ecofurn.eu

For over a decade, EcoFurn has been striving to manufacture ecological products from solid wood. There are four characteristics that connect all our products - they are attractive, durable, fixable and recyclable.

Inspired by the wonderful nature in Finland, we combine decades of experience in handicraft with fresh design. As a result we have created products that are easy on the eye, but also sustainable and climate friendly.

We are not done, this is a work in progress. In years to come, new products will be designed with the same set of values.

Join us for the journey!
