SE

Skruvfästningar i våtzon 1 ska göras i betong eller annan massiv konstruktion, träreglar, träkortlingar eller i konstruktion som är provad och godkänd för infästning, till exempel skivkonstruktion. Se exempel på godkända konstruktioner på säkervatten.se. Krav på tätning gäller både i våtzon 1 och 2. Material för tätning ska fästa mot underlaget och vara vattenbeständigt, mögelresistent och åldersbeständigt.

GB

Below are Swedish recommendations:
Screw fastenings should be made in concrete or other solid structure, wooden studs, wooden noggings or in structures that have been tested and approved for fastenings, for example a sheet construction. Requirements for sealing apply in wet zones 1 and 2. See examples of construction at säkervatten.se. Sealing materials must be fixed to the underlying layer and must be waterproof, mould-resistant and age-resistant.
