HEATIT WIFI PANEL HEATER FEATURES

Heatit WiFi Panel Heater/List is an electrical radiator. The convector can be controlled using the "MyHeatit" App via Wi-Fi, Bluetooth (BLE), by the buttons on the top, or through the open API over Wi-Fi.

Heatit WiFi Panel Heater has 2 modes; Comfort and Eco.

Heatit WiFi Panel Heater has a modern, slim design and is aesthetically pleasing. It is easy to install and can be either mounted on the wall or freestanding on legs (optional equipment).

Heatit WiFi Panel Heater has active power metering and it gives you real time information about your power consumption.

MyHeatit

We have launched a new, forward-thinking Wi-Fi concept. All of our new Heatit products with Wi-Fi support can be controlled through our newly developed app, "MyHeatit".

In the future, we will be launching more products based on Wi-Fi technology.

The MyHeatit app is designed to meet both the user's and installer's needs. The installer can configure the system via Bluetooth. After the system is set up, the installer can add the property to the customer. The customer can then add the system to their local Wi-Fi network.

In the "MyHeatit" app, you can create your own profiles such as "Home – Away – Night – Vacation," allowing you to control, monitor, and organize all your connected devices, or manage them through a weekly schedule.

Available on the **App Store**

GET IT ON **Google Play**

More products will become available on the MyHeatit platform in the future
