5. CONVENTIONAL SWITCH:

Along with JOHDOTON-transmitters, UKM-3000

is controllable also with conventional switches (see Chapter 6 too).

Wire as shown on the page 12 in pictures 2 and 3. S1 terminal is for Channel 1 and S2

terminal is for Channel 2.

a receiver or a group of receivers goes to predetermined state (On/Off). Brightness level

can be predetermined too with M-series dimmer receivers.

Explore 'JOHDOTON' transmitter collection and see what features available transmitter models do have.
