The gas supply injector, when in place, simply sits inside the receiving side burner tube and does not require mounting or coupling and is held in place by the support mounting bracket.

Kaasunsyöttösuutin, kun se on paikallaan, istuu vastaanottavan puolen poltinputken sisälle eikä vaadi asennusta tai kytkentää ja se pysyy paikallaantukikiinnikkeen avulla.

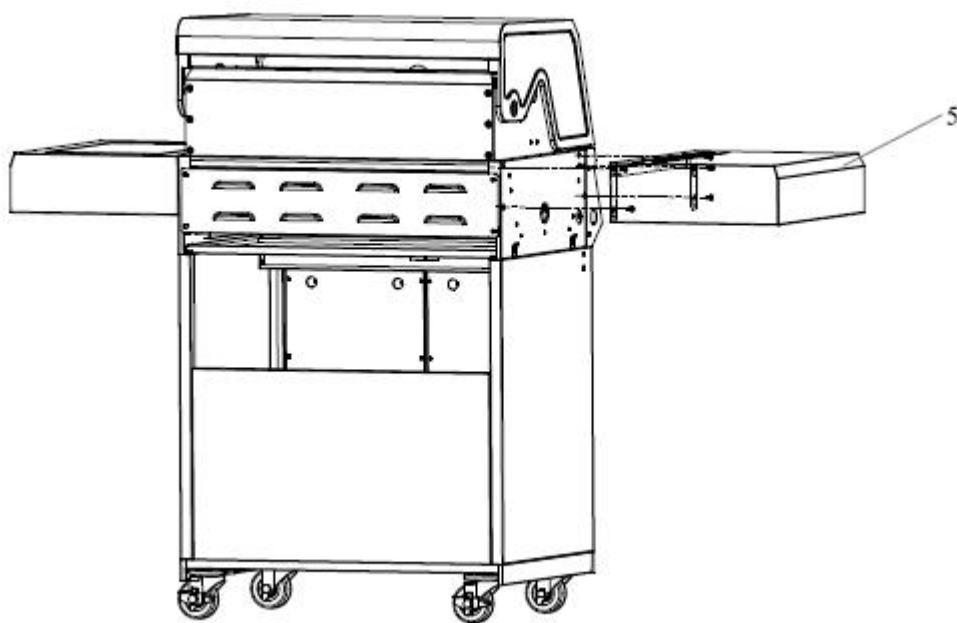

Gasinjektorn, närdenärpålats, sitter helt enkelt inuti den mottagandesidobrännarröret och gör kräver inte montering eller koppling och hålls på plats av stödets monteringsfäste.
