

AQUAPHOR®
water filters

W3101-2F

Water purifier

Why choose a water purifier?

Saving space in the office, no need to store bottles.

Effectively contributes to the protection of the environment.

No need to buy bottled water. Buying a purifier pays off in a few months, depending on water consumption.

Crystal clear and purified water always at your fingertips.

End of single-use plastic bottles.

Cold or hot water, adjustable temperature.

Suitable for

Offices and shops

Offer your teams or your customers pure and tasty water all day long.

Hotels and restaurants

The water dispenser meets the needs of restaurants and hotels.

Medical institutions

Safe and purified water for medical staff and patients.

Sports halls and sports clubs

Offer easily available, healthy and water to your members.

Advantages

RO filtration system
with a mineralization

100 Gallon Pump

Low power
consumption 510W

Ability to adjust the
temperature in the
tank with cold and hot
water

UV lamp

Overheating
protection

Two separate storage
tanks with a total
volume of 5.2 liters

Modern laconic design

Leakage protection

AQUAPHOR®

Burn protection

Burn protection protects against burns if accidentally pressed. If you press the hot water faucet, the water will not flow. To pour hot water from the dispenser, press the special button on the hot water tap.

AQUAPHOR®

Function selection

On the back panel of the dispenser there are buttons for turning on the heating and cooling functions.

You can use only one function, so you can save energy.

AQUAPHOR®

Leakage protection

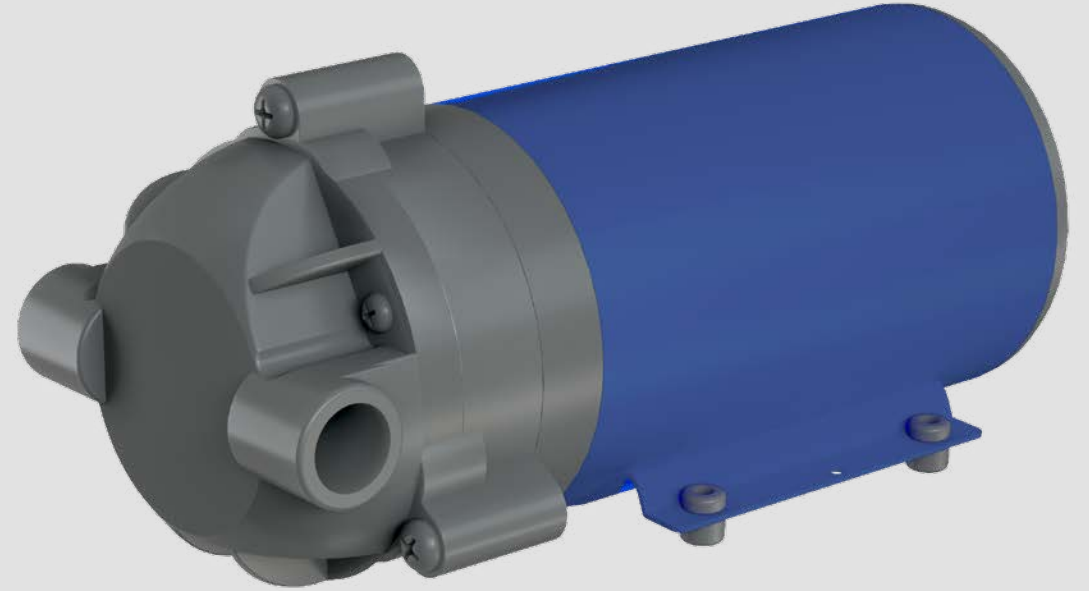

The sensor to protect against water leaks monitors your dispenser 24 hours a day, without breaks or weekends. In case of a leak, the sensor reacts within a few seconds, shutting off the water supply without your participation.

AQUAPHOR®

100 Gallon Pump

- Increases a flow pressure and a water filtration rate.
- Pumps 60 liters per hour.
- Switches off when the water tank is filled.
- Doesn't work if there is no main water pipeline.

AQUAPHOR®

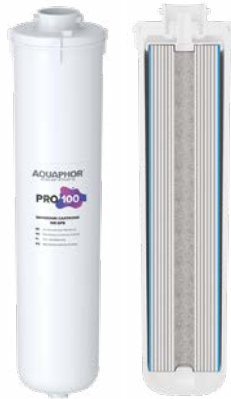

Multi-stage filtration system

PRO 1

Pre-filtration 2 in 1

Innovative cartridge combines mechanical filtration up to 10 microns and sorption filtration up to 3 microns.

PRO 100

Membrane cartridge

- Performance: 100 gallons per day / 380 L per day.
- Reverse osmosis membrane for deep purification and softening of water.
- Complete protection against bacteria and viruses.
- Absolute water softening and limescale protection.

PRO M

Water mineralization

- Natural minerals enrich the water with magnesium.
- Improves the taste of drinking water.
- Creates optimal salt balance.
- Provides water conditioning.

Specification

Control type	Push-press
Housing material	ABS + EGI Steel
Water pipes connection	Yes
Water level sensor	Yes
Water types	Cold, hot
RO Filters	Yes
RO pump	100 gallons
Heating Power	420 W
Hot water tanks material	Stainless steel 304
Hot water temperature	85-95 °C
Hot water capacity L\h	5 L/h
Hot water tanks capacity	2 L
Heating Mode	Tubular Electric Heating Element
Water supply lock	Yes
Cold water tank capacity	3.2 L
Cooling type	Compressor

Cold Water tanks material	Stainless steel 304
Cold water temperature	6-10 °C
Cooling Power	90 W
UV lamp	Yes
Water level sensor	Yes
Voltage	220-240 V, 50 Hz
Number of faucets	2 pcs (Hot and Cold)
Overheat protection	Yes
Leakage protection	Yes
Noise level	59 dB
Inlet water pressure	0.4Mpa
Power cord length	1.5 m
Dimensions LxWxH mm	310x350x1100
Box dimensions LxWxH mm	385x360x1150
Net weight	22 kg
Gross weight	25 Kg

AQUAPHOR®

**Purified water for
the well-being of all.
High quality filtration
guaranteed**
