

LED GU10

W0J+14703

One bulb, three light colors - warm, neutral, cool. Change the color directly on the bulb! LED source LED GU10 6 W with the possibility of changing the light color (CCT) with the popular GU10 socket and classic shape. Thanks to the ability to change the color temperature (CCT) in the range from 3000K to 6000K, we can adjust the light color depending on our needs and preferences. The CCT function allows you to changes to the colour temperature of light (3000/4000/6000K). Narrow beam angle 38° gives directional light so that selected objects or surfaces can be better exposed. *For safety reasons, changing the light colour should only be done when the bulb is turned off.
